

1 Holomorphic Embedding Load Flow Method (HELM)

1.1 Basics

1.2 Overview

1.3 Sigma approximants

1.4 GridCal

2 Flexible General Branch Model (FGBM)

2.1 Modelling

2.2 FGBM + HELM

3 Alternating Search Directions (ASD)

3.1 Formulation

4 Proper Generalised Decomposition (PGD)

4.1 Multidimensional power flow

4.2 Algorithm

Table of contents

1 Holomorphic Embedding Load Flow Method (HELM)

- 1.1 Basics
- 1.2 Overview
- 1.3 Sigma approximants
- 1.4 GridCal

2 Flexible General Branch Model (FGBM)

- 2.1 Modelling
- 2.2 FGBM + HELM

3 Alternating Search Directions (ASD)

- 3.1 Formulation

4 Proper Generalised Decomposition (PGD)

- 4.1 Multidimensional power flow
- 4.2 Algorithm

1 Holomorphic Embedding Load Flow Method (HELM)

- 1.1 Basics
- 1.2 Overview
- 1.3 Sigma approximants
- 1.4 GridCal

2 Flexible General Branch Model (FGBM)

- 2.1 Modelling
- 2.2 FGBM + HELM

3 Alternating Search Directions (ASD)

- 3.1 Formulation

4 Proper Generalised Decomposition (PGD)

- 4.1 Multidimensional power flow
- 4.2 Algorithm
